

Fetal Origins & Anti-Poverty Policies

Wednesday, October 10; 12:10-1:30 pm
Andrews Conference Room, 2203 SS&H

DOUG ALMOND is an Associate Professor of International and Public Affairs and Economics at Columbia. Dr. Almond's primary research areas are health and applied microeconomics, with a particular interest in infant health and the environment. He previously served as a staff economist at the Council of Economic Advisers during the Clinton administration and studied the health effects of air pollution in China as a Fulbright scholar. Almond received his BA from Carleton College in Minnesota and PhD from the University of California, Berkeley, where he received the departmental award for research on public policy.
