

ISS Noon Lecture: New Results on Head Start's Impact

Doug Miller, University of California, Davis, Department of Economics

Wednesday, April 15, 2015

Memorial Union, MU II

12:10 - 1:00pm

Brown bag lunches welcome | Lecture begins promptly at 12:10pm

Doug Miller is an Associate Professor of Economics at UC Davis. He received his Ph.D. in Economics from Princeton University in 2000. He is a research affiliate of the Center for Poverty Research at UC Davis, and serves as a Research Associate for the National Bureau of Economic Research.

Miller's research examines the impact of economic forces, social policy, and the environment on health. He has measured the effects of business cycles, inheritances, Head Start, the Earned Income Tax Credit, and air pollution on infant, child, and adult health. He works in the area of applied econometrics, using and building tools for measuring casual effects and for conducting accurate statistical inference. He also has research interests in development economics.
